SOFT CLOSER 120

Triline's new soft close accessory is available for Hercules, Zero Clearance and Frameless Glass cavity sliders with doors weighing up to 120kg.

The neat design allows the device to be housed inside the track ensuring minimum clearances between the track and door are maintained.

The Soft Close 120 is easy to install and simple to operate as the spring and damper work together to control the door. The mechanism catches the moving door and reduces its speed before drawing it towards the jamb ensuring a quiet and soft stop every time. This reduction in speed also means little fingers are kept safe from slamming doors.
