## CAVITY SWITCH UNIT

Utilise the walls on either side of your sliding door unit for all your electrical needs with the Cavity Switch unit.

Rangerbuilt cavity switch unit is an innovative new product that allows the installation of light switches and power points onto a wall with a cavity sliding door unit or commonly known as a pocket door. With Rangerbuilt cavity switch, electrical wires are protected from the movements of the door enabling you to utilise the walls on either side of your sliding door unit for all your electrical needs.
